The diagram illustrates the transmission of HIV virus through sexual contact between six individuals: Estelita, Agapito, Ordono, Petronila, Crescencia, Homobono, and Rufina. The diagram shows how the virus spreads from one person to another via sexual contact, represented by lines connecting them. Each person is associated with a set of colored shapes (squares, circles, triangles) representing the virus, and a small icon of a virus particle is shown near each person.

# Herencia (2/3)

# Herencia (3/3)

# Herencia Múltiple

- ▶ En caso de que una clase tenga más de un padre, hereda de ambos
- ▶ Estas propiedades (atributos, operaciones) son la unión de los padres
- ▶ En lenguajes de programación como Java no es posible implementar la herencia múltiple
